

Grandstand Directions for The IKEA DetOLF Shelving

From Jim Dubberly's [original plans](#) (Click here)

Supplies needed to make 1 shelf

5 - Home Depot or Lowes
Yardsticks (found in Paint dept)

2 - 80" Plastic tile molding
You get 6 pieces from each 80"
strip (In wood molding dept)

Glue for wood to wood and
Glue for work to Plastic

Paint

(if painting moulding pick one that adheres to Plastic.
See considerations below)

Tools:

A saw to cut yardsticks and moulding
A sander (optional)

Sizes to cut from the Yardsticks

(note: Measure after each cut because you will need to account for
the size of your cutting blade!)

Stick #1: (3 Pieces) 14", 9 3/4", 9 3/4" = 3 pieces

Stick #2: (4 Pieces) 14", 14", 6 3/4", 1 in

Stick #3: (4 Pieces same as #2) 14", 14", 6 3/4", 1 in

Stick #4 (7 Pieces) 8 1/4", 8 1/4", 5 1/4", 3 3/4", 3 3/4",
2 1/2" 2 1/2"

Stick #5: (3 Pieces) 14", 14", 5 1/4"

Go Dispense some Good Today!

Step Heights:

- 1 inch
- 2 1/2 inches
- 3 3/4 inches
- 5 1/4 inches
- 6 3/4 inches
- 8 1/4 inches
- 9 3/4 inches

- Glue the edges of the sides together. I used wood glue and after about 10 mins I gently moved the steps so they wouldn't adhere to my plastic table.

- I then stood the sides up and put items to hold them up. I then placed the shelves on before I glued them on so they were as straight as possible.

- *Before adding moulding you may want to sand the sticks down a bit. I found the spray paint I used had bled through. Regular paint worked much better. Also depends on the finished look of the sides you want. The numbers may show through.

- Then I placed the moulding and turned over to glue. I put glue on the shelf and the moulding. Once tacky, I then positioned them (the glue is smelly and best done with MUCH ventilation)

- Paint to your color desire. I used regular paint then sprayed some glitter on them. You know, for glitter!
